**Read the passage and answer the following questions:**

**Passage 1:**

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they can not live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses – they usually attack your body and make you sick.

١. Viruses are as big as bacteria.                      a . True                      b . False

٢. Bacteria can live on their own.                      a True                      b . False

٣. "Viruses need to be inside a living cell to live and grow." This means.....

a . a living cell needs viruses to live and grow .

b. our body needs viruses to live and grow

c . viruses need to live and grow.

d . in a living cell, viruses can live and grow.

**B**

٤. Why aren't viruses many good things?

.....

Passage ٢:

Polar bears are one of the world's largest animals. They live in the north, around the area of the Arctic ocean. People cannot hunt them because they are endangered animals.

About the age of four or five the polar bears can start having babies. They usually have two babies. They stay at their homes over winter and come out in spring with the babies.

The babies are very small when they're born. They are the size of a big mouse. They can become as big as a full man size in a year if they eat lots of food. Their favorite food is seal but they sometimes eat other kinds of animals.

١. Where do polar bears live?

.....

٢. How big will the baby bears become after a year?

.....

٣. Their babies are the size of a big mouse.                      a. True                      b. False

٤. Polar bears usually have five babies.                      a. True                      b. False

*With the best wishes*
